FCC MAIL ROOM

To the FCC:

I support the FCC's proposal to grant LPFM licenses with the intent of opening up the FM bandwidth to a wider variety of voices. In support of that goal, I would like to see LPFM licenses targeted toward non-profit organizations which are ideally suited to represent community voices.

Furthermore, I would not like to see the distribution of these Low-Watt licenses become primarily a matter of chance. Therefore, I am in support of the FCC's proposed "point system" (cf. News Report No. MM98-14, Oct. 21, 1998) for the allocation of frequencies among a number of applicants.

Thank you for considering these comments.
